37	6/4/2010	SC to ET	x		phone	SC was concerned about view shed, described concern that the proposed project would be a "visual eye sore".	NN has additional notes. Proposed in person meeting to discuss issues	6/4/2010
38	6/10/2010	ET to SC		x	phone	NN followed up to request meeting. delivered phone message. No response		
39	6/16/2010	ET to CJ	x		email	Subject: Windpark Dev. Millhaven Sent date: 06/24/2010 11:07:40 AM I am inq about the project proposal planning to engage in a renewable energy project in a area designated for agriculture use. I am opposing this development and I have issues with costs and being an adjacent neighbor...with the long term health implications of my family and neighbors. This project should be planned in a non-populated area on scrub land...and what are the costs involved for the taxpayers? My name is CJ Mailing address is <removed for privacy> also own farm at <removed for privacy> Looking forward to a reply ASAP.		6/28/2010
40	6/28/2010	ET to CJ		x	email	Subject: Re: Windpark Dev. Millhaven Sent date: 06/28/2010 10:53:49 AM Hi C, Thank you for writing to us. We will include your comments as part of the consultation report for this project. I am happy to answer your questions here. This entire project will be funded privately by our company, no taxpayer money will be used to funding this project. The project is planned near industrial land, north of Taylor Kidd Blvd, and in zones designated suitable for renewable energy development in concessions 1 and 2 as defined in the township's Draft Official Plan Amendment. We recognize that the loss of agricultural land is always an important concern. The turbines will occupy a small footprint at the base, less than 5m of the lands. The total infrastructure for this project is expected to occupy less than 1% of the lands, the remaining 99% will continue to be used for farming and existing activities. The modern wind industry includes a 25 year history with almost 70,000 turbines installed near homes all over the world. We understand that long term health implications are of your family and neighbours, and we take this concern very seriously. That said, the dominant and most widely accepted evidence on health impacts and wind turbines indicate that there are no health impacts associated with wind turbines. I'm providing here a detailed report on health and wind turbines as issued by the Ministry of Health and Long Term Care: http://www.health.gov.on.ca/en/public/publications/ministry_reports/wind_turbine/wind_turbine.aspx I hope this answers your questions. Please don't hesitate to write back to us if you have additional questions or concerns. Thank you and regards, Nhung -- Nhung Nguyen Project Manager Ernestown Windpark Toll Free: 1-877-389-4099. 101	7/16/2011	ET to FB		x	in person	FB showed Interest in events in the community including those in which the proponent would be involved. The respondent was cautious in speaking about wind energy; the proponent provided general overview of proposed project.		
102	7/16/2011	ET to L		x	in person	L was interested in wind turbines and the Ernestown Wind Park, and stated support for the project.		
96	7/16/2011	ET to GI		x	in person	Not supportive as indicated on survey following 2010 public meeting. GI is a landowner over 550 m from project location, concerned about noise and visual impact. "Moved to rural area to be away from this sort of thing." Stated that he 'would prefer turbines are in Industrial Park" ET provided newsletter #2.		
3	7/23/2011	ET to EF		x	email	Date: On 07/23/2011 03:21:17 PM Subject: Ernestown Wind Park Hello Edith. Hello Henry. My name is KS and I've recently started working with Ernestown Wind Park. I have to admit that you are the very first people who I've phoned as a representative of the Ernestown Wind Park. I decided to start by talking with the people who had provided supportive messages at the open house last year and were likely to be friendly. As I mentioned when I called, the Ernestown Wind Park is still in the process of completing the reports required for an application for Renewable Energy Approval. This wind park is the only wind project that we are proposing for Loyalist Township. Ernestown Wind Park is a small wind park project, with a maximum of 10MW and a maximum of six wind turbines. The site is just north of Taylor Kidd Blvd, in an area designated by the township's own official plan to be appropriate for developments like renewable energy generation. Although approval currently is at the provincial level, I am happy to see that we also meet the intent of the local planning authorities. If you have any questions about the proposed project, I would be pleased to look for answers to your questions. If there is any information that you feel we should know, whether it concerns the proposed project directly or the community in general, we would welcome hearing from you. If you know of anyone who would like to receive updates, or who you think should be receiving updates, please let us know. You can reach me and other members of the team at info@ernestownwind.com or toll free at 1-877-389-4099. Thank you for your time. Sincerely, KS		
50	7/26/2011	ET to HF		x	phone	Phoned to give project updates and answer questions but no answer on phone line. HF indicated support on survey following public meeting in 2010. ET delivered newsletter, July 27, 2011		
51	7/26/2011	ET to GM		x	phone	Phoned to give project updates and answer questions but no answer on phone line. GM indicated support on survey following public meeting in 2010. ET delivered newsletter, July 27, 2011		
52	7/26/2011	ET to TN		x	phone	Phoned to give project updates and answer questions but no answer on phone line. Indicated that he wants to be kept informed about set back and construction phase, delivered newsletter on July 27, 2011		
53	7/26/2011	ET to FM		x	phone	Phoned to give project updates and answer questions but no answer on phone line. FM is a landowner over 550m from project location. No concerns indicated on survey. Delivered newsletter on July 27, 2011		
54	7/26/2011	ET to BP		x	phone	Open house survey response in 2010 indicated no opinion about the project. BP is a landowner more than 550m from project location. BP indicated concerns regarding auditory and visual impact, as well as impacts on wildlife. Requested to be kept informed with newsletters, although requested that they be delivered in mailbox. Newsletter delivered July 27, 2011		
46	7/27/2011	ET to EF		x	in person	Delivered newsletter #2 in mailbox		
55	7/27/2011	ET to JDA		x	in person	Not supportive, as indicated on survey following 2010 open house. Land located over 550m from project location. JDA indicated on survey concerns about various factors related to project, particularly night sky visual impact. In person, did not offer opinions. Concerned that he would be able to see wind turbines from home near Bath. Requested to be kept informed. Delivered newsletter #2 to JDA, who requested that future information be delivered in mailbox.		
56	7/27/2011	ET to DD		x	in person	Open house survey response in 2010 indicated no opinion about the project. DD is a landowner over 550 m from project location. Resident indicated concern about impact to wildlife, noise impact, and visual impact. DD requested to remain informed, including information regarding Loyalist Township tax revenue. ET delivered newsletter #2 to mail box.		
57	7/27/2011	ET to HM		x	in person	delivered newsletter #2 in mail box.		
58	7/27/2011	ET to DS		x	in person	Not supportive, as indicated on survey following 2010 open house. DS is a landowner over 550 m from project location. They cite concerns about potential visual impact, noise impact, and impacts to wildlife. Concerned about economic impact of renewable energy and the combination of electrical generation sources. ET delivered newsletter #2 in mail box, and sent e-mail to offer a meeting by phone or in person to discuss concerns.		8/6/2010

Index	Date	Name	Public	ET	Medium	Message	Notes	Response Date
59	7/27/2011	ET to KC		x	in person	Neutral on survey. Indicated concern about wildlife and noise. Landowner over 550m from project location. ET delivered newsletter #2 in mail box, and sent e-mail to offer a meeting by phone or in person to discuss concerns.		
60	7/27/2011	ET to AK		x	in person	Homeowner received project introduction information, and Newsletter #2		
61	7/27/2011	ET to HF		x	in person	Indicated support during discussion, received Newsletter #2		
62	7/27/2011	ET to GM		x	in person	Neutral opinion, requested to be kept informed, gave Newsletter #2		
63	7/27/2011	ET to GG		x	in person	Neutral opinion, requested to be kept informed, gave Newsletter #2		
64	7/27/2011	ET to RC		x	in person	Neutral opinion, requested to be kept informed, gave Newsletter #2		
65	7/27/2011	ET to DL		x	in person	Neutral opinion to the project, as indicated on survey following 2010 public meeting. DL is a landowner over 550 m from project location. Indicated concerns included visual impact, noise impact, impacts to wildlife, and the efficiency of wind turbines. Spoke with husband and wife. She indicated non-support and concern about other projects proposed in the area, but was neutral to the proposed project. He indicated concern regarding maintaining base load for the province.	ET followed up with letter to provide references to online material about Betz limits, wind efficiency, and intermittency; also included reference to efficiencies of other fuels for generating electricity.	Delivered letter, Aug 6. 2011
66	8/3/2011	ET to AS		x	email	Sent intro email about Newsletter #2

94	8/6/2011	ET to TN		x	in person	Would like to be kept informed about construction phase. TN said "this area has good wind resources so it seems like a logical place to find wind turbines". Second resident that spoke with ET requested information about health concerns. Spoke with residents in two of the three units. Both expressed support.		
95	8/6/2011	ET to JV		x	in person	Van was leaving driveway as I approached driveway. Delivered newsletter #2 in mailbox		
6	8/7/2011	ML to ET	x		email	Date: On Sun, 7 Aug 2011 13:31:09 -0400 Subject: Ernestown Wind Turbines I have been reading the current website (report dated June 14, 210) and I must admit that this project seems to be an improvement over the Wolfe Island wind turbines; however, I am attaching two recent newspaper articles regarding wind turbines on Wolfe Island and I would like to hear your comments on these? With regards to human health issues, I feel more research is needed. Also, the City of Kingston has been hit with an increase of 8% on their Hydro bills. What would we, Loyalist Township residents expect? Perhaps I am misinformed but I thought the wind turbine project on Wolfe Island was supposed to help with electricity and keep increases to a minimum? Who will benefit from this Ernestown Wind Project? Hopefully the tax payers of Loyalist Township? Looking forward to hearing your response to these questions and I would be pleased to receive updated information. Thank you. Cheers, ML		8/12/2011
4	8/8/2011	DL to ET	x		email	Date 8 Aug 2011 13:24:54 -0400 Subject: energy efficiency Hi K, Thanks for the info; the sygration web site is very interesting even though it does not have the photovoltaic data. One thing that is not clear to me is what is the lowest output a turbine typically has i.e. when the wind is very low but the turbine still produces, what is the base level? Knowing this level, and the average time the turbines will not operate for a particular site, you get a number for the lowest expected output from a particular site. Presumably this is something you calculate for any particular site, giving both a worst case scenario or the lowest output and a more realistic scenario for any particular site. Thanks for your info, DL		8/10/2011
69	8/8/2011	ET to BH		x	in person	Dropped by later on Aug 8 when residents were home. Requested information about potential impact on Parrott Bay wildlife and who would be studying the impact on birds. Wondered if presentation could be arranged for township employees.		
8	8/9/2011	ET to ML		x	email	Date: 08/19/2011 09:40:15 AM Subject: Community Groups Hello M, I was wondering if you could help me with a couple of things. I've been asked to talk with representatives of community groups in Loyalist Township and to ask them if their group would be interested in having Ernestown Wind Park give a presentation about the proposed project. Do you have any suggestions for the names of groups in your community? It doesn't matter whether it is a service group, a book club, a sports club, or any other shared interest. We want to keep residents informed, and we want to hear their comments, questions and concerns. If you also have a contact name or have contact information, that would be appreciated. As well, if you know of any community events or community projects we would be interested in finding ways to be involved. Thank you. KS		8/19/2011

5	8/10/2011	KS to DL		x	email	<p>Date: On 08/10/2011 12:03:24 PM Subject: Re: energy efficiency</p> <p>Hello Mr. L, I believe what you are looking for is a power curve chart for wind turbines (wind speed vs. MW). There are numerous power curve charts on the internet, if you wish to explore this further. I've also added some links below to some resources that provide background on the technology and calculations. To find power curve charts, I used the Image search at the top of the Google search page, with the following search string: +"wind turbines" +"power curve" name-of-a-manufacturer For example, GE, Siemen, Vestas, or "typical" Power is expressed in kW Energy is expressed in kWh Overview of wind power http://en.wikipedia.org/wiki/Wind_power Calculating wind power http://www.reuk.co.uk/Calculation-of-Wind-Power.htm Calculating annual wind energy http://www.sustainableenergyworld.eu/calculate-windturbine-annual-energy I hope you find these useful. Sincerely, K</p>		
7	8/12/2011	ET to ML		x	email	<p>Date: On 08/12/2011 10:35:42 AM Subject: RE: Ernestown Wind Turbines To: ET</p> <p>I can't comment on wind projects developed by other companies, but I can provide some resources on the subject of wind turbines and wildlife. Wikipedia is my favorite place to start, since it's like a modern Encyclopedia Britanica, with articles by independent experts. Environmental impact of wind power. This article includes discussions on both wildlife and health issues. http://en.wikipedia.org/wiki/Environmental_impact_of_wind_power Human causes of bird mortality (including glass, transmission lines, habitat loss and cats) http://www.currykerlinger.com/birds.htm It should be noted that the first large wind facility, located in California, has been the site of the highest numbers of bird fatalities. Newer turbines rotate at a slower speed and are spaced further apart. I found it interesting to read the original field notes of the biologist studying short-eared owls on Wolfe Island. Her notes on June 10, 2010, comment on the role of agriculture in the decline of owls that nest in the ground. http://www.migrationresearch.org/research/shortear/fieldnotes.html In regards to the price of electricity for consumers, wind generated electricity accounts for less than 3% of electricity in Ontario. At present, wind energy has little influence on the price at the meter. We have an aging infrastructure in Ontario, which needs to be replaced or upgraded. Coal generating facilities are slated to be decommissioned. Nuclear facilities are expensive, take many years to develop, and have many safety concerns. Existing hydro facilities can produce cheap electricity, but new facilities will be more expensive, no matter what type is built. The 20-year fixed-price offered to wind generate electricity is designed to encourage businesses to support renewable energy development. As the price of extracting and delivering fossil fuels increases, the price of wind energy developed today will remain constant. Benefits for Loyalist Township include: - tax revenue, - jobs, during the construction phase and the long-term operation and maintenance phase, and - becoming a centre of expertise. St. Lawrence College and Queen's University both have programs that support the skills and knowledge that are required to develop renewable energy facilities. We will continue to monitor the latest developments and the scientific data collected, locally and elsewhere. We want to implement the best practices and technological solutions available at the time. I hope this is useful information. If you have further questions or concerns, please let me know.</p> <p>Thank-you for your interest in the proposed Ernestown Wind Park! Sincerely, K</p>

I was wondering if you and your group would be interested in having the Ernestown Wind Park give a short presentation about their proposed wind facility. The proposed location is for 10MW, with a maximum of six wind turbines, north of the intersection of Taylor Kidd Blvd and Jim Snow Drive, adjacent to the Taylor Kidd Industrial Park. We want the community to be informed about the proposed project. I am willing to come to one of your regular meetings, or another time that suits your members, to hear your comments, hear your concerns and answer you questions. If you or any of members of your group are interested, please let me know. Alternatively, I could talk to people individually, if that is what they would prefer. I've attached three files: a letter of introduction, a copy of the draft project description, and our Notice of a Proposal. The Notice was printed in newspapers last year. I can give you printed copies, if you would like. The draft project description and all the supporting draft reports are available on our website: http://www.ernestownwind.com I look forward to hearing from you. Sincerely, KS Ernestown Wind Park (If you are no longer the contact person for the Odessa and District Lions Club, I would appreciate if you could let me know who is the current contact person. In any case, let me know if you would like me to add your name to our e-mail distribution list, so I can keep you informed of the proposed project's status.)</p>

I can give you printed copies, if you would like. The draft project description and all the supporting draft reports are available on our website: http://www.ernestownwind.com I look forward to arranging a presentation to the Bath and District Lions Club. Sincerely, KS Ernestown Wind Park		
22	8/30/2011	EF to ET	x		email	Date: Tues, 30 Aug 2011 Subject Progress Report K would you please send us an update of the progress report Thank you in advance E		8/30/2011
23	8/30/2011	ET to EF		x	email	Subject: Re: Progress report Sent date: 08/30/2011 08:09:56 PM Hello E The Ernestown Wind Park website is going to be updated in the next couple of weeks. I believe that the project manager plans to include more information about wind turbines in general on the revised website. The draft Project Description and the reports that are on the current website are the only formal reports available until the final reports are submitted to the Ministry of the Environment. There will be a notice on the website at least 60 days before the reports are submitted, and I will send out an email message to everyone who has given me their email address. The final reports will all be posted on our website so that the community can review them and make comments or ask questions. There will also be a second round of public meetings, and those will also be advertised. If you know of anyone who would like a presentation about the proposed Ernestown Wind Park, please let me know. It doesn't have to be a formal organization. A group of friends, a book club or a local branch of a service club are all part of the community, and I would like to hear their comments, concerns and questions. I may not have answers to all the questions people might have, but I'll try to find answers. Sincerely, K		
24	8/31/2011	DG to ET	x		email	Date: Wed, 31 Aug 2011 14:10:10 -0400 Subject: RE: Ernestown Wind Park Hello K: Thank you for the opportunity to hear more about this project. I feel this is way too political for the mission of our club so at this time we will not be taking up your offer. Best Regards, DG President Amherstview Lions Club		9/2/2011

109	9/1/2011	ET to PG		x	in person	Respondent had not heard of proposed project. spoke to PG, who is building a home on the site. Assured him that he wouldn't see turbines over mature cedars on his property. Didn't seem disturbed by the news. Introduced proposed project, size and location. delivered newsletter.		
110	9/1/2011	ET to DB		x	in person	Respondent had not heard of proposed project. spoke to woman about the project Introduced proposed project, size and location. delivered newsletter.		
111	9/1/2011	ET to RK		x	in person	Respondent had not heard of proposed project. spoke to RK about the proposed project Very interested in project and generally interested in sustainable living. Asked questions about turbines. Asked why would anyone be opposed to wind turbines. ET introduced proposed project, size and location and delivered newsletter.		
25	9/2/2011	ET to DG		x	email	Subject: Offer to make presentation to the Amherstview Lions Club Sent date: 09/02/2011 03:13:51 PM Dear D, I'm sorry to hear your response. I have no intention of making a political presentation. We want to keep the community informed about the status of the proposed Ernestown Wind Park. We would like to hear the comments, concerns and questions that people in Loyalist Township may have about the project. Just to clarify, the Ernestown Wind Park is the only wind park project that we are proposing in eastern Ontario. In any case, I would like to invite you to visit our website: http://www.ernestownwind.com All the draft reports for the project are on our website. We plan to update the website before the end of September. If you have comments, concerns or questions about the project, please send me an email. If you or anyone else would like to talk to me by phone or in person, individually or as a group, let me know by leaving a message at either info@ernestownwind.com or toll-free 1-416-877-389-4099. Thank you, D. Sincerely, K		
113	9/2/2011	ET to BV		x	in person	supportive spoken hallway at SLC regarding EWP and regarding in general		
114	9/2/2011	ET to SC		x	in person	supportive - asked for email to remind about request for letter of support Send SC email regarding ETW and request for letter of support. Followed up with e-mail reminder about letter.		
115	9/3/2011	ET to MH		x	in person	Very supportive. Supportive of green energy and carbon emission reduction. Wanted to have a wind turbine on his own property, but doesn't own enough land. MH asked what he could do to help and I suggested he write a letter to the mayor or ministry of the environment and cc us on the email.		
116	9/3/2011	ET to SG		x	in person	Recently bought house & 50 acres property so they could live in rural area. Resident upset to hear about proposed wind turbine park. Her response was that she needed to contact her lawyer as she had not been informed by previous owners at time of purchase. Introduced proposed project, size and location. delivered newsletter.		
117	9/3/2011	ET to MH1		x	in person	MH1 was aware of the project, as relative owns part of the project lands. Answered general questions and delivered newsletter.		
118	9/3/2011	ET to JS		x	in person	Well informed and supportive of proposed wind park. Familiar with the proposal and township news. Discussed the proposed project, size and location, delivered newsletter.		
119	9/3/2011	ET to DR		x	in person	Resident asked a few general questions about the proposed project and said it sounded good. "Introduced proposed project, size and location, delivered newsletter.		
120	9/3/2011	ET to MS		x	in person	Supportive. Introduced proposed project, size and location; delivered newsletter.		
121	9/6/2011	ET to SK		x	in person	SK was aware of the project proposal and had no questions. ET provided proposed project details of size and location; delivered newsletter.		
122	9/6/2011	ET to TM		x	in person	nobody home at the time of visit; delivered newsletter in mailbox.		
123	9/6/2011	ET to GW		x	in person	Resident stated support for the project. Introduced proposed project, size and location; delivered newsletter.		
124	9/6/2011	ET to MS1		x	in person	Asked many sensible questions and in the end seemed satisfied with the setbacks to ensure that noise levels would not disturb his sleep and safety precautions (e.g., locked, enclosed towers) to prevent people from attempting to climb or vandalize the towers. Requested information regarding blasting during construction. Asked about fencing to keep cattle away from towers and transformers. ET introduced proposed project, size and location and delivered newsletter.

Thank you for allowing me the opportunity to talk to my fellow classmates. I received over two dozen letters of support for renewable energy! A very positive response. I'll see you on Thursday. Karen (Please see attached letter.)		
28	9/13/2011	ET to TI		x	email	Subject: No Subject Sent date:09/13/2011 01:18:54 PM Attachments: Request for a letter of support - Tim Irwin.doc [40 KB] Hello T, Thank you for meeting with Anthony Zwig, Nhung and myself in the midst of CORK's annual regattas. I spent many hours as a child on my father's Enterprise, with its distinctive blue sails. It wasn't quite an Olympic caliber craft, but it was thrilling. I must admit, I've never learned to trust a craft that depends on a motor. As Tony outlined in our conversation, Ernestown Wind Park is proposing to develop a 10MW wind turbine facility in Loyalist Township, just west of Kingston. We are gathering letters of support for the proposed wind park, and I'm hoping I can count on your support. I've attached an overview of the proposed project, a sample letter and addresses. I look forward to hearing from you. Sincerely, KS Ernestown Wind Park info@ernestownwind.com		
29	9/13/2011	DA to ET	x		email	On Tue, 13 Sep 2011 13:11:17 -0400, May I forward this to SWITCH (or maybe you've already done so)? Are you looking for personal letters or one from the College? From the College will require approval from the President. Glad to see that you being kept busy! And with worthwhile projects. DA, P.Eng. Coordinator, Energy Systems Programs St. Lawrence College, Kingston 613-544-5400 ext. 1245		9/13/2011
30	9/13/2011	ET to DA		x	email	Subject: Re: A request for a letter of support Sent date: 09/13/2011 01:29:17 PM Hello David, A personal letter would be wonderful. I suspect that, with the current situation at the college, getting anything approved at the moment would require extraordinary determination. JFD, who works with Ernestown Wind, is on the Switch Kingston Board of Directors. I believe that he has already received approval to request letters of support from members. Thank you, though, for suggesting Switch. Point of interest: Randy Hillier, who is the MPP for Lanark-Frontenac-Lennox and Addington and the area that includes Loyalist Township, was fourth on the ballot at the last PC leadership convention. Hillier put his support Tim Hudak. For better or worse, I believe it would be fair to say Mr. Hudak will listen to Mr. Hillier. I included email addresses for both Mr. Hillier and the mayor of Loyalist Township in the file attached to my earlier message. Sincerely, K

180	9/21/2011	ET to AP		x	in person	No one home. delivered newsletter.		
181	9/21/2011	ET to V		x	in person	spoke to resident. She listened and seemed interested. She didn't ask questions but said she had no concerns when asked.		
182	9/21/2011	ET to CB		x	in person	No one home. delivered newsletter.		
183	9/21/2011	ET to SE		x	in person	Landowner has lived on the property for about 40 years. Stated concerns about auditory impacts and impacts to property values. Concerned about impact of rising expense of heating, electricity and property taxes on seniors. Cited that she was concerned about bat and bird mortality as well as shadow flicker or reflected glare flicker.		
184	9/28/2011	ET to SM		x	in person	Generally supportive of new businesses in the region. Discussed potential business opportunities. Introduced SM to Ernestown Wind Park. Met at her office in Kingston, along with JK and NN		
185	9/28/2011	ET to JK		x	in person	Regional business owner. Generally supportive of new businesses in the region. Discussed potential business opportunities. Introduced JK to Ernestown Wind Park. Met at office in Kingston. JK has experience working with renewable energy companies in the UK. Met with SM and NN.		
186	9/28/2011	ET to DP		x	in person	Introduced Greater Kingston Chamber of Commerce and what they can offer businesses in the Kingston area. "Membership/Marketing Introduced DP and Greater Kingston Chamber of Commerce to Ernestown Wind Park. Met at Kingston office."		
31	10/9/2011	LK to ET	x		email	Subject: Status of Ernestown Wind Park Project On Sun, 9 Oct 2011 10:33:11 -0400 Dear Sir/Madam: Could you please advise me of the status of this wind project. Is the project still going forward and if so what is your timetable? Thank-you, LK		10/13/2011
174	10/11/2011	ET to MM		x	in person	spoke for over half an hour at his front door. Second visit, resident flatly stated that he is not supportive. I asked what were his concerns. This opened the conversation to an overview of the proposed project, and his concern that he'd heard about health concerns. He didn't directly say he was concerned about the viewscape or property values, but he asked about setbacks and noise. Interestingly, he was the one to turn the conversation to the broader issue of decommissioning coal-fired electrical generators. That seemed to resonate as a good policy goal. We spoke about the reduction in smog days last summer and the relation between recent windy days and how much of Ontario's electricity is already generated by wind. Lennox is still needed as back-up during maintenance and extreme situations. Encouraged him to email us if he had any other questions or concerns, and so I could email him with updates on the status of the proposed project. I thanked him for his time.

32	10/13/2011	ET to LK		x	email	Subject: Re: Status of Ernestown Wind Project Sent date: 10/13/2011 02:56:54 PM Hello L, In response to your questions, Ernestown Wind Park gave a presentation to the Loyalist Township in April, 2010, posted Notice of Proposal and Public Meetings in newspapers and online in June, 2010, and had its first public meetings in June, 2010. The Draft Project Description is available on our website: http://www.ernestownwind.com Since then, we've been working on completing the reports that must be submitted for a Renewable Energy Approval application. As you are probably aware, Ernestown Wind Park is proposing a 10MW project to be built on private land along the Taylor Kidd Industrial Park, north of Jim Snow Drive and Taylor Kidd Blvd. The proposal is for a maximum of 6 turbines. Since the reports are still under development and the proposal has not yet been submitted, a timetable has not yet been established. With your permission, I'll add your e-mail address to our distribution list, so that we can keep you informed. If you would like, I'd be pleased to meet with you to discuss the project. K		
33	10/14/2011	LK to ET	x		email	Subject: Re: Status of Ernestown Wind Project On Fri, 14 Oct 2011 07:15:39 -0400 Thank you for this update and I would appreciate being placed on your e-mail list. LK <phone numbers removed>		10/14/2011
34	10/14/2011	ET to LK		x	email	Subject: Re: Status of Ernestown Wind Project Sent date: 10/14/2011 09:05:25 AM Hello L I'll keep you informed. In the meanwhile, if you would like meet with me to talk about the proposed project, let me know. I can come over to the island or meet you for a coffee on the mainland. K		
187	10/22/2011	ET to TR		x	in person	Resides within 550m of project location. Indicated that he was aware of the proposed project. Asked no questions and did not express any concerns. I still reviewed the main details of the project. Encouraged him to email us if he had any other questions or concerns, and so I could email him with updates on the status of the proposed project.		
188	10/28/2011	ET to KC		x	in person	Resides within 550m of project location. Residents are aware of the proposed project and interested in learning more. Didn't express support for the project but didn't express opposition. Asked about setbacks, noise, height of hub, whether there would be blasting, depth of foundations, access roads. Asked whether the community will benefit from the project. I mentioned property tax to municipality over the next 20 years and income tax to the federal government from income generated by the project. Also said we were looking for other ways to contribute to the community and encouraged him to email us if he had any suggestions. Encouraged him to email us if he had any other questions or concerns, so I could email him with updates on the status of the proposed project. Introduced proposed project, size and location. delivered newsletter.		
189	10/28/2011	ET to MG		x	in person	spoke to man, who was familiar to the project from first newsletter. Would like to attend next open house or public meeting. Reviewed main details of proposed project. Said he had internet & would look up our website. "Introduced proposed project, size and location. delivered newsletter"		
190	10/28/2011	ET to AK		x	in person	spoke to woman about project. She lives near north west corner of project location. I reviewed main details, including min. 550m setback. Explained that location of turbines has not yet been finalized. She commented that she has friend that lives on Wolfe Island & asked about noise. She asked about why different than turbines she had seen elsewhere. She described an older model. Shorter, faster spinning. When I asked if she would email us if she had any ideas about what we could do for the community, she asked if project would lower her electricity bill. She has already installed CFLs. I encouraged her to email us so I could keep her informed about status. Introduced proposed project, size and location. delivered newsletter.		
191	10/28/2011	ET to DW		x	in person	No one home. delivered newsletter.		
192	10/28/2011	ET to BM		x	in person	No one home. delivered newsletter.

194	10/28/2011	ET to Res		x	in person	No one home. delivered newsletter.		
195	10/28/2011	ET to AK		x	in person	No one home. delivered newsletter.		
196	10/28/2011	ET to TM		x	in person	The black Great Dane that greeted my car is only 11 months old, but it is over 100lb. I waited until owner came out & put dog in house. We chatted about dogs. She had thought I was there to check out the place before the kids' Halloween party. Her cheerful demeanor didn't change when I clarified the purpose of my visit. She was familiar with the project from another neighbour. I reviewed main points. Asked if project would lower her electrical bill. Said she would visit our website. Introduced proposed project, size and location. delivered newsletter.		
197	10/28/2011	ET to AK		x	in person	No one home. delivered newsletter.		
198	10/28/2011	ET to BC		x	in person	No one home. delivered newsletter.		
199	10/28/2011	ET to NP		x	in person	No one home. delivered newsletter.		

Index	Date	Name	Public	ET	Medium	Message	Notes	Response Date
200	10/28/2011	ET to RA		x	in person	No one home. delivered newsletter.		
201	10/28/2011	ET to SL		x	in person	No one home. delivered newsletter.		
202	11/2/2011	ET to BJ		x	in person	Woman who answered door informed me that she was a tenant at this house because she sold her house on Millhaven Road as soon as she heard about the proposed project. I asked her to contact me if she had questions or ideas about how we could contribute to the community.		
203	11/2/2011	ET to RM				She had heard about the proposed project but didn't attend meeting. She is not supportive of wind turbines. She stated concerns about auditory impact and avian mortality. She said she concerned about their effect on the environment and on property values. We spoke about setback and noise restrictions, pollution from fossil fuels and the situation on Wolfe Island, in particular the ferry and its impact on property sales. Mentioned concerns with rising expense of heating, electricity and property taxes on seniors. Said she'd watch our website. delivered newsletter and map of project location.		
204	11/2/2011	ET to SL		x	in person	No one home. delivered newsletter.		
205	11/2/2011	ET to NB		x	in person	No one home. delivered newsletter.		
206	11/2/2011	ET to MG		x	in person	No one home. delivered newsletter.		
207	11/2/2011	ET to CR		x	in person	No one home. delivered newsletter.		
208	11/2/2011	ET to BC		x	in person	No one home. delivered newsletter.		
209	12/6/2011	ET to MS		x	in person	Expressed interest in both the environmental aspect of proposed project and process for interacting with the community. He views both as potential learning experiences for students. He is active in a ratepayers association that is lobbying Kingston City Council to lobby to take a stand against the current Green Energy Act. To be specific, he feels that municipalities should have a greater say in where renewable energy projects are located. He made a very clear that he is not against renewable energy, but rather that he is against projects that are poorly located. MS was not aware of the proposed Ernestown Wind Park, so I spoke with him about how the project began before the Green Energy Act was passed. I told him where the proposed project was situated and described the zoning for the area. His response was, to paraphrase, "It's too bad that more developers don't follow your approach."		
210	12/9/2011	ET to Res		x	in person	Resides on the north side of Amherst Island, south of the town of Bath. He has two main concerns: bird sanctuaries on the island and the transmission of noise vibration from the turbines to homes through the bedrock. I told him that I have not seen any studies regarding the transmission of noise wave vibrations through bedrock. Moved to Amherst Island a few years ago when he retired. He enjoys stargazing and he's concerned that the lights from the turbines will deprive him of that enjoyment. He's a supporter of nuclear, and thinks people make too much of a fuss over the dangers; he didn't raise any direct objections to our project. I asked him to send me an e-mail so I can add him to our distribution list and keep him informed. As of 2012.03.28, no communication received.		
35	1/8/2012	KP to ET	x		email	Date: Sun, 8 Jan 2012 21:19:18 -0500 Subject: developer experience your website identifies some information about the project and Ernestown Windpark LP and the project developer. Could you please provide more information about the experience you have with development and the corporate structure of this project. KP		1/16/2012
36	1/16/2012	ET to KP		x	email	Subject: Re: developer experience Sent date: 01/16/2012 09:07:39 AM Hello Mr. P, Thank you for your inquiry about Ernestown Wind Park. As described on our website: "Ernestown Windpark Inc. was established with a mission to develop, own, and operate a small, low impact wind energy facility in Loyalist Township. Ernestown Windpark Inc will handle the development, construction and operation of the Ernestown Wind Park. Ernestown Windpark Inc. is a general partner of Ernestown Windpark LP, which is based in Toronto, Ontario. In April of 2010, Ernestown Windpark LP was awarded an energy supply contract with the Ontario Power Authority for a minimum period of 20 years. The contract was awarded by the OPA under the Ontario FIT program." Horizon Legacy is the owner of Ernestown Windpark Inc. Horizon Legacy is a private company, owned by the Zwig family. As described on the Horizon Legacy website (http://renewable-energy.horizonlegacy.com), Horizon Legacy has over 50 years of experience in the construction industry. In recent years, the company has supported the development of renewable energy. Currently, Horizon Legacy is an owner or partner of three operational wind facilities. I hope this answers your questions. Sincerely,		
212	7/12/2012	ET to AR		x	in person	Resident is resistant to change and distrustful of a Hydro One, the government, and other land owners. Concerns about care of lands, viewshed, auditory impacts and electricity prices. Spoke with him about turbine placement and viewshed, and setbacks. Gave him more information regarding the OPA, wind developer relationship, and the cost of electricity. spoke about the changing economics in rural economies and how wind parks can help increase tax base in the Township. Did not try to change his mind about anything. Have invited him to come to our Public Meetings, let him know that notices would be out soon, and invited to our coffee meetings being held in August; delivered newsletters with him.		

Index	Date	Name	Public	ET	Medium	Message	Notes	Response Date
213	7/12/2012	ET to CE		x	in person	CE has researched turbines, and visited a nearby wind park to talk to residents. Not too concerned. Glad that turbine set backs will mean that lots behind them will not be developed for housing. Concerned about construction safety for children; traffic while building. Let them know that I would send the construction report once the draft REA reports were available to the public; and that we would be updating them about construction. Invited them to coffees meetings in August, and let them know that the public meeting notices would be out soon. Sent construction report via email on July 23.		
214	7/12/2012	ET to DL		x	in person	Requested information about property values, visual impact and health concerns. Had heard about new Health Canada Study about the effects on health and noise from wind turbines. Gave DL the FAQ link sheet with link about property values. Explained relationship between developer and OPA. Explained FIT contract and that we are limited to 10 MW, and in this case that means 5 turbines. spoke to him about view sheds, and let him know when the draft REA reports would be on the website so that he could look at view sheds images. Let him know that we welcome the new Health Canada Study. Invited him to August coffees meeting, and let him know that the notices for the Public Meetings would be out soon.		
215	7/12/2012	ET to RM		x	in person	Neutral about the project. Interested in knowing how far he is from closest turbine; interested in coming to come to Public Meetings. Gauged distance to closest turbine using site map. Told him we hoped that he would attend the Public Meetings. (He will receive notice in mail as he is a neighbour of the project.)		
216	7/12/2012	ET to JM		x	in person	Interested in working for the project, has training in renewable energy technology. Asked him to send us his resume, and gave him our contact information and newsletters.		
247	7/12/2012	ET to 7 Millhaven Road Residents		x	in person	Left newsletters, and invitation to contact us.		
217	7/13/2012	ET to B		x	in person	Hadn't heard about the project, very happy to receive information. Delivered her the newsletters and invite to Public Meetings and coffee meetings in August.		
248	7/13/2012	ET to Bath Road Resident		x	in person	Left newsletters, and invitation to contact us.		
218	7/19/2012	ET to PC		x	in person	Resident has concerns that the number of turbines will increase in the future and has general concerns about possible health effects. Explained that our contract is for 10 MW, and in this case, there will be 5 turbines and spoke to her about the 2010 MOH Report and our welcoming the new Health Canada Study. Showed her the site plan and view sheds and the distance the turbines would be from her home. Invited her to Public Meetings and delivered newsletters. Her home is pictured in one of our view shed images, and she has given her consent for us to use it in our public relations material.		
219	7/19/2012	ET to GP		x	in person	Resident not at home - house sitter worked previously in the coal industry, and commented that: "They are taking turbines off-line in Europe." Empathized with his frustration of loss work in the coal industry, and we chatted about the ever evolving landscape of electricity generation. Asked him for sources of his information about turbines coming 'off-line'. He did not have a specific source to site. delivered newsletters and invited him to our Public Meetings, and asked him to pass on our invitation to the home owner.		
220	7/19/2012	ET to PG		x	in person	Generally positive and interested in the project. Was interested in how the developer, the OPA and Hydro One are related. Wanted information about how to read his Hydro bill. delivered newsletters and invited to Public Meetings. Followed up via email with information about hydro bills.		7/24/2012
221	7/19/2012	ET to Bath Road Resident		x	in person	New to property in the last year. Didn't know about the project. No questions or concerns. Spoke with resident about the project, and delivered newsletters and contact information, invited to Public Meetings.		
222	7/19/2012	ET to GSM		x	in person	Very supportive of project. Attended first public meeting. delivered newsletters and invited to Public Meetings and coffee meetings.		
249	7/19/2012	ET to 8 County Road 4 Residents		x	in person	Left newsletters, and invitation to contact us.		
250	7/19/2012	ET to Taylor-Kidd Blvd Resident		x	in person	Left newsletters, and invitation to contact us.		
223	7/20/2012	ET to GK		x	in person	Concerned about property values (although his home is on industrial land). Friend visiting asked about health issues. Had a long chat about where we are in the REA process, and property values. delivered him with our URL sheet with links to studies on property values and health. Showed him set back maps. Sent him more information on property values via email as a follow-up. Invited him to coffees and Public Meetings.		7/24/2012
224	7/20/2012	ET to NB		x	in person	Hadn't heard of project. No personal concerns, but brought up that a friend has concerns regarding birds. Gave her URL sheet with info regarding birds, and suggested her friend could also read our draft REA report. delivered her newsletters and invited her to the coffee meetings in August and September Public Meetings.		
225	7/20/2012	ET to MS		x	in person	No concerns. delivered newsletters and invited to Public Meetings.		
226	7/20/2012	ET to GG		x	in person	Very positive about wind projects in general. Would like a large format map of the proposed project site. delivered newsletters and invited to Public Meetings.	Large format map mailed on 2012.07.24	

Index	Date	Name	Public	ET	Medium	Message	Notes	Response Date
227	7/20/2012	ET to SC		x	in person	Very interested in the project and its potential impact (view shed and sound) on those living closest to the project. Showed SC noise impact maps, visual impact report, and setback from turbines. Invited to Public Meetings.		
228	7/20/2012	ET to DC		x	in person	Has friends who live close to a large wind installation, who were proponents, who are now opponents due to reported effect of sound on household pet (aversion to part of property nearest turbine), and elderly family member (loss of sleep). Spoke with DC about the results of the 2010 MOH Report, and the new Government of Canada study. delivered newsletters and invited to Public Meetings and coffee meetings.		
229	7/20/2012	ET to DC		x	in person	Supportive, no concerns. Thanked for time, delivered newsletters and invited to coffee meetings and Public Meetings.		
230	7/20/2012	ET to Millhaven Road Resident		x	in person	"Doesn't like turbines". Received notice about Public Meetings and draft REA reports being available, but hadn't had time to look at the website. delivered newsletters and invited to Public Meetings, invited him to call MT once he had reviewed draft REA reports. attend Public Meetings.		
251	7/20/2012	ET to 7 Millhaven Road Residents		x	in person	Left newsletters, and invitation to contact us.		
242	7/23/2012	ET to CE		x	email	Sent 2012-07-23 Subject: RE: Ernestown Windpark Draft Construction Report Hi C, It was great to talk to you on the 12th. I wanted to follow up on our conversation about the construction phase of the Ernestown Windpark. Our Draft Construction Report is now published on our website on the Documents page: www.ernestownwindpark.com/kjhg , and I have also attached it here. It's about 10 pages long. You can also view it at the library at 102 Main Street, or the Township Office at 263 Main Street, in Odessa. This report outlines the transportation requirements and presents a preliminary analysis of transportation routes. It is anticipated and described in the plan that turbine components will be transported along Highway 401 (Hwy 401) and through Loyalist Township to the site. The report examined route safety, road construction, bridges, overhead utilities, intersection geometries, community disruption, seasonal weather, and traffic volumes. The Roads & Bridges division for the County of Lennox & Addington was consulted regarding local road restrictions and permitting requirements. Please don't hesitate to email or call if you have any questions. Best regards, MT		
231	7/27/2012	ET to SE		x	in person	Shadow flicker, distance of turbines to her property. EWP has previously spoken with SE about her concerns shadow flicker at the 1812 Bath Centennial Celebrations event in June 2012, and in 2011 at her door. Stopped by to talk to her about her concerns, and show her the distance from the turbines to her farm. EWP has decided to do a shadow flicker study for her house.		
232	7/27/2012	ET to Bath Road Resident		x	in person	Concerned about view shed of project proposed on Amherst Island. No concerns about our project. Please keep informed regarding construction schedules and transportation plans. Discussed construction and transportation reports, invited to Public and coffee meetings.		
233	7/27/2012	ET to Millhaven Road Resident		x	in person	Didn't know about the project, as they only occupy the residence during the summer. Did not cite any concerns. delivered newsletters and invited her to attend meetings, if she is still in the area.		
234	7/27/2012	ET to Bath Road Resident		x	in person	He had received notices about another project in the region. He did not understand the notices, so I explained the notices to him.		
235	7/27/2012	ET to Bath Road Resident		x	in person	Generally positive. Suggested she look at reports and if she has any questions, to contact us. Invited her to Public Meetings.		
236	7/27/2012	ET to Bath Road Resident		x	in person	Hasn't had a chance to look at website yet (after receiving notice of Public Meetings), not particularly interested. Invited him to contact us if he did have any questions after reviewing the website. Gave him newsletters and invited them to the Public Meetings.		
237	7/27/2012	ET to Bath Road Resident		x	in person	Very positive. Wants to see more turbines. delivered newsletters and invited to Public Meetings.		
238	7/27/2012	ET to Bath Road Resident		x	in person	Would like a turbine in their 'back yard'. Live along Bath RD, near Jim Snow DR, please keep informed regarding transportation when construction begins. delivered newsletters and invited to Public Meetings.		
252	7/27/2012	ET to 17 Bath Road Residents		x	in person	Left newsletters, and invitation to contact us.		
253	7/27/2012	ET to 5 Caton Road Residents		x	in person	Left newsletters, and invitation to contact us.		
239	7/31/2012	ET to J		x	phone	Concerned that there may be more than 5 turbines. Concerned about the cost of electricity, and how renewable energy may be effecting costs. J does not have access to the internet, so is unable to gather info. from the site, so I spoke to her at length about the project, Fit contracts, the role of the OPA, and the developer, and electricity costs. Invited to Public Meetings.		

Index	Date	Name	Public	ET	Medium	Message	Notes	Response Date
240	8/2/2012	ET to SE		x	phone	Stated concerns about shadow flicker, distance of turbines to her property, and sound impact. EWP stopped by and took photos and GPS readings to do a shadow flicker study which EWP delivered her with info about distance to the turbines, noise decibel level and the liberal shadow flicker estimates. Sent her a letter after our meeting to summarize the conversation.		
243	8/17/2012	ET to Res		x	in person	Thought there was a moratorium on wind turbines (for the period of the Health Canada study)Let her know that there was no moratorium, and that the study would probably take 2 yrs., and that it is expected that people who live near turbines will be interviewed.		
244	8/17/2012	ET to Millhaven Road Resident		x	in person	Extremely supportive of renewable energy in general and had no concerns about the EWP project. Said that unless people live off grid and are producing their own power they really shouldn't complain about renewable energy projects. Delivered coffee meeting invitation.		
245	8/17/2012	ET to Millhaven Road Resident		x	in person	Extremely supportive of renewable energy. Worked on a local wind project. Very interested to know if the taxes EWP will pay will lower his homeowner taxes. delivered newsletters, coffee meeting invitation		
246	8/17/2012	ET to Chattersson Road Resident		x	in person	No concerns cited; delivered with newsletters and invitations to coffee meetings		
254	8/17/2012	ET to 6 Millhaven Road Residents		x	in person	Left newsletters, and invitation to contact us.		
255	8/20/2012	ET to Caton Road Resident		x	in person	Left newsletters, and invitation to contact us.		
256	8/20/2012	ET to 16 Wing Road Residents		x	in person	Left newsletters, and invitation to contact us.		
257	8/20/2012	ET to 5 Millhaven Road Residents		x	in person	Left newsletters, and invitation to contact us.
